### ***Allowable Subject Matter***

Claims 12-25, 33-36 and 43-45 are allowed.

The following is an examiner's statement of reasons for allowance:

The applicant's independent claims have several similarities as well as differences with the Moody (US 6308378) and DeLuca et al. (US 6591456, hereinafter "DeLuca") patents. Both disclose a housing, a motor within the housing, a gripping

portion, a blister pack with flexible sheets defining a damping gel-containing chamber therebetween and at least one clamping member. However, the prior art of record does not disclose that none of the gel within said chamber is located between a bottom surface of said clamping member and the housing. Also, the prior art of record does not disclose that none of the gel within said chamber is located between a bottom surface of said gripping member or cover piece and the housing or handle. Further, there is no reason to modify DeLuca since the gel-containing portion, as shown in Figures 12 and 13, needs to be placed directly beneath the gripping portion/clamping member/cover piece (210,230,250) for said portion to be properly secured to the rest of the invention. (See first paragraph of column 7 of DeLuca).

None of the other prior art references whether taken alone or used in combination cure the deficiency of DeLuca. Thus, the prior art as a whole made of record does not disclose or suggest the structural arrangement or the combination of structure set forth in Applicant's claims. As a result, the Examiner believes Applicant's claims as presented are patentably distinct from the prior art of record and the general prior art pertaining to ergonomic handles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
